[Anterior or Posterior Hip Replacement Surgery: Which is ...](#)

Salyapongse explains what he has seen first hand: "patients who have had anterior hip surgery on one side and posterior hip surgery on the other, most often prefer the anterior hip side." In other words, in cases of patients who've had bilateral hip replacements (whether staggered by weeks or years, or done at the same time), notable feedback is that they preferred the anterior replacement.

[Is Anterior Hip Replacement Surgery Better?](#)

There are advantages and disadvantages of the different approaches for hip replacement surgery. While some argue that rehab may be faster or pain may be less, there is conflicting data to support this argument. Some studies have found no difference in recovery when an anterior approach hip replacement is compared to other techniques.

[Hip Surgery: Posterior vs. Anterior Total Hip Replacement ...](#)

A total hip replacement has the ability to relieve pain and restore normal function in patients whose hip joint has been destroyed by trauma or disease. In this type of surgery, the damaged hip socket and ball of the femur are replaced by man made implants. This surgery has been done routinely for the past 50+ years with great success. The average hip replacement lasts 20-30 years or more. [Anterior Hip Replacement | Nevada Hospitals | Dignity Health](#)

Anterior hip replacement is typically performed in a hospital and requires a stay of one or two nights. Most hip replacement procedures are performed under general anesthesia, although some surgeons will allow patients to have regional anesthesia (nerve block) instead, which thoroughly numbs the surgical area without putting you to sleep.
