standard exposition of the basic multilevel model involving random coefficients at level 2 and above, together with a discussion of some likelihood-based estimation procedures.

Handbook of Multilevel Analysis | SpringerLink
Multilevel analysis is the statistical analysis of hierarchically and non-hierarchically nested data. The simplest example is clustered data, such as a sample of students clustered within schools. Multilevel data are especially prevalent in the social and behavioral sciences and in the bio-medical sciences. The models used for this type of data are linear and nonlinear regression models that account for observed and unobserved heterogeneity at the various levels in the data.

research design and analysis and discuss the importance of context, dynamics, and complexity.

[Handbook of Multilevel Analysis: Jan Deleeuw, Erik Meijer ...](#)

There is even a chapter on non-hierarchical multilevel models. Also resampling is covered as a possible approach to point and confidence interval estimation for multilevel models. I recommend that Chapter 1 be read first if multilevel are new to you. However it is not the easiest chapter to read as the authors' dialogue and notation seem to presume some prior knowledge of the subject.

[Mehrebenenanalyse Wikipedia](#)

Mehrebenenanalysen (englisch Multilevel Modeling) auch als Hierarchisch Lineare Modellierung (englisch Hierarchical Linear Modeling) sind eine Gruppe multivariater statistischer Verfahren zur Analyse hierarchisch strukturierter Daten (englisch nested data), die vor allem in der empirischen Sozialforschung Anwendung finden.
