Life-cycle analysis of the built environment

LCA (life-cycle analysis, or life-cycle assessment) is an important tool for use in applying life-cycle thinking to building and construction. LCA can yield vital information on material and energy flows. Because it is difficult to apply to build-ings per se, the focus is increasingly on carrying out a more general analysis of the built environment.

Life-cycle assessment - Wikipedia

Life Cycle Assessment of Engineered Material in Service plays a significant role in saving energy, conserving resources and saving billions by preventing premature failure of critical engineered component in a machine or equipment.
