[Why the internet of things could destroy the welfare state ...](#)

However, a politics without politics does not mean a politics without control or administration. As O'Reilly writes in his essay: "New technologies make it possible to reduce the amount of regulation while actually increasing the amount of oversight and production of desirable outcomes." Thus, it's a mistake to think that Silicon Valley wants

[Difference Between Policy and Politics | Difference Between](#)

1. Politics can be defined as a science or art of governing or government, especially governing a political entity like a nation. A policy can be defined as an overall plan that embraces the general goals. 2. Politics refers to authority and refers to public life. Politics generally revolves round government and its activities. Politics is a term that refers to the organizational process.
