It offers the insights of these leading authorities regarding cognition and personality. In particular, they address the roles of constructs and values in clarifying the theoretical and empirical work in these fields, as well as their relation to educational assessment.

[The Role of Constructs in Psychological and Educational ...](#)

This is in part due to the limited number of items in the Q set directly related to the role of social (items 14, 25, 29) or material factors (items 11 and 18). We found the development of these statements problematic as we did not want to ask about health inequalities too directly for fear of encouraging socially desirable responses [35].
